INFORMATION DISCLOSURE STATEMENT
UNDER 37 C.F.R. § 1.97

Commissioner for Patents
PO Box 1450
Alexandria, Virginia 22313-1450

Sir:

Please find, pursuant to 37 C.F.R. § 1.98(a)(1), the enclosed Form PTO-1449 which contains a list of all patents, publications, or other items that have come to the attention of one or more of the individuals designated in 37 C.F.R. § 1.56(c). While no representation is made that these references may be "prior art" within the meaning of that term under 35 U.S.C. §§ 102 or 103, the enclosed listed references are disclosed so as to fully comply with the duty of disclosure set forth in 37 C.F.R. § 1.56.

Moreover, while no representation is made that a specific search of office files or patent office records has been conducted or that no better art exists, the undersigned attorney of record believes that the enclosed art is the closest to the claimed invention (taken in its entirety) of which the undersigned is presently aware, and no art which is closer to the claimed invention (taken in its entirety) has been knowingly withheld.

In accordance with 37 C.F.R. §§ 1.97 and 1.98, a copy of each of the listed references or relevant portion thereof that is not a US patent document is also enclosed.

Statement of Relevance of References Listed
Unaccompanied by English Translation
Under 37 CFR § 1.98(a)(3)

In accordance with 37 CFR § 1.98(a)(3), the following concise explanation of the relevance of each listed reference that is not in the English language and unaccompanied by a translation into English is provided.

German Application No. DE 39 42 594 A1: The invention relates to a device for conveying workpieces or workpiece carriers with at least one conveyor roller driven by an electric motor. In a prior art device of this kind there is a magnetic slipping clutch in addition to each drive motor. To avoid the need for such an additional coupling, according to the invention the conveyor roller (40) is sliplessly connected to the drive motor (60) and the motor is of the short-circuit-proof type. Preferred fields of use are devices for conveying parts in regions of assemblies to which access is difficult or to convey items adversely affected by dust and dirt.

Dated this 15th day of January 2007.

Respectfully submitted,

/Dana L. Tangren/ Reg. # 37246
